

## Cool Summer Trend: Stripy Awnings

With the promise of record-beating temperatures this summer, there's never been a better time to invest in a stylish awning to provide shade to outdoor living spaces and keep adjacent rooms cool.

And one fabric is tipped to be a major seller in homes across the UK this year – Apollo's green multi-stripe fabric.

Made-to-measure awnings are one of the most effective ways to provide flexible shade and shelter.

A range of optional extras such as integral heaters and lights can extend the use of an awning, allowing customers to use it longer into the night and in colder months.

And, for those who like gadgets, the awnings are available with sun sensors, which extend the canopy automatically depending on the strength of the daylight.

For a limited period, Apollo's 4 x 3metre motorised Tortola awning in green multi-stripe fabric, is now available at £1,999.00 and includes remote control handset and vibration sensor (which automatically retracts the awning in windy conditions). \*Promotional awnings come with standard brackets and installation is not included.

Apollo awnings are available in a range of 240 fabrics, adding style and comfort to the outside of any home. There are also four types of frames, which can be motorised or manually operated, and a range of optional extras. All Apollo awnings and canopies are professionally surveyed and installed by our team to guarantee they fit beautifully.
